Education

Univ. of South Carolina

Moore School of Business

PhD, Finance (2021)

Dissertation: "Three Essays on Agency Costs in Corporate Finance".

Committee: Eric Powers (Chair), Allen Berger, Hugh Kim, Omrane Guedhami.

GPA: 3.63/4

Indiana State University

Scott College of Business

MBA (2014)

Finance Concentration.

GPA: 3.94/4

King Saud University

B.S. - Bus. Admin., 2010

Concentration Track: Financial Management.

GPA: 4/5

Biography

Eyad Alhudhaif is an Assistant Professor who brings a unique blend of research insights, teaching excellence, and technical prowess to the classroom and beyond. His research centers around corporate finance, where he dives deep into topics such as Capital and Debt Maturity Structures, Dividend Policies, and Corporate Governance. His recent work involves textual analysis of financial disclosures and the various implications it has on our understanding of classical corporate theories.

Beyond the academic toolkit, Dr. Alhudhaif wields programming languages, such as Python and Stata, to various applications in his career. Examples include automating financial analyses, building programs for clients, or implementing cutting-edge algorithms to his own work. Dr. Alhudhaif believes that the intersection of finance & technology holds an immense promise for reshaping the industry.

Affiliations

Assistant Professor of Finance

*College of Business Administration
King Saud University*

02/2022 - Present

Teaching responsibilities includes MBA courses as well as Bachelor's degree courses taken by senior students. I am currently a member of the curriculum committee. In addition, I was the academic supervisor for the Cooperative Training Program for 2 consecutive semesters. This was an opportunity to receive important feedback from potential employers on what aspects of the education service we as faculties need to improve in order to graduate more competitiveness students in the job market.

Financial Consultant

*Malaah Financial Consulting
Riyadh, Saudi Arabia*

09/2023 - 06/2024

Providing consulting services to companies and individuals by increasing shareholder value and improving both capital efficiency & liquidity. Many of these services require capital budgeting, financial analysis, and micro/macro economic data research.

Research Assistant

*Moore School of Business
University of South Carolina*

08/2015 - 12/2020

Assisted the following faculties with research related tasks; Dongmei Li, Sergey Tsyplakov, Da Ke, John Hackney, and Matthew Souther. Tasks include webscraping, preliminary analysis, literature review, and essay reviews. Assisted Eric Powers in building a Monte Carlo simulation for his class assignment for several academic semesters.

AACSB Assistant Coordinator

*Scott College of Business
Indiana State University*

05/2014 - 05/2015

Worked with the business college to document and ensure faculties' intellectual contributions meet AACSB's requirements for the five-year accreditation report.

Teaching Experience

Investment Analysis (BA523)

2025 - present

*College of Business Administration
King Saud University*

The objective of this course is to study theory and empirical evidence relevant for portfolio management. An emphasis is placed on understanding how an investment professional would allocate funds in a hypothetical portfolio. Major topics include estimation of capital market parameters, trade-off between risk and return, optimal portfolio selection, equilibrium asset pricing models, and delegated portfolio management.

Portfolio Theory & Investment Analysis (FIN363)

2025 - present

*College of Business Administration
King Saud University*

This course is designed to provide a foundation for the fundamental principles related to investments. An emphasis is placed on understanding how an investment professional would allocate funds in a hypothetical portfolio. Topics include trade-off between risk & return, optimal portfolio selection, equilibrium asset pricing models, equity valuation, and fixed-income securities. Among the main objectives of this course is understanding how security markets function, and learning how to develop investment strategies.

Mathematics of Money & Investments (QUAN127)

2022 - 2024

*College of Business Administration, Muzahmiyah Campus
King Saud University*

This course is designed to strengthen students' understanding of neoclassical theories in finance by introducing the mathematical principles and techniques behind essential concepts; such as compound interest, present value of money, hedging, arbitrage, and pricing financial contracts. By the end of the course, students will understand the mathematical underpinnings of various financial instruments and apply mathematical reasoning to solve practical financial problems.

Case Studies in Finance & Investments (FINA423)

2022 - 2024

*College of Business Administration, Muzahmiyah Campus
King Saud University*

This advanced course is designed to extend and deepen students' practical understanding on a range of topics in the finance discipline. Students by the end of the academic semester will gain the ability to obtain, organize, and analyze financial data using computer software. Further, students' problem identification, engagement & participation within a team, and data analysis skills will all be improved by using both Python and Office Excel. By the end, students will have the ability to place policy recommendations based on their preliminary research findings.

Portfolio Theory & Investment Analysis (FINA363)

2022 - 2024

*College of Business Administration, Muzahmiyah Campus
King Saud University*

The course provides an in-depth discussion of fundamental principles related to investment analysis and portfolio management. Topics include investment instruments, portfolio theory, equity valuation, fixed-income securities, and option valuation. Upon completion, students are expected to understand security market functions, recognize the risk-return trade-off, and develop investment strategies. Further, mastering the material covered in this course will aid students in their preparation for the CFA exams level I.

Corporate Finance (FINA210)

2024

*College of Business Administration, Muzahmiyah Campus
King Saud University*

Being one of the core subjects in any modern finance college program, this course aims to introduce a foundational understanding of corporate finance principles to undergraduate students. As such, the course equip students with essential tools that aid in business decision-making. Through a blend of theory and applications, students will explore key corporate decisions, such as capital budgeting & investments, financing, optimal capital structure, and dividend policy.

Investment Analysis & Portfolio Management (FINA469)

Summer 2017 & 2019

*Moore School of Business
University of South Carolina*

The course provides an in-depth discussion of fundamental principles related to investment analysis and portfolio management. Topics include investment instruments, portfolio theory, equity valuation, fixed-income securities, and option valuation. Upon the completion of the course, students are expected to understand security market functions, recognize the risk-return trade-off in investments, and able to develop investment strategies. Further, understanding the knowledge covered in the course help students prepare for the CFA exams.

Number of students: 19, Evaluation score: 4.55/5.

Business Statistics I (BUS205)

Fall - 2014

*Scott College of Business
Indiana State University*

An introductory business statistics course. Topics include graphical concepts, measures of central tendency and dispersion, basic probability concepts, random variables, central limit theorem, and hypothesis testing and confidence intervals. Learning is assisted by statistical software applications. The emphasis is on problem solving for decision making.

Number of students: 30, Evaluation score: 3.77/5.

Working Papers

- Alhudhaif, Eyad. (2021). "The Asymmetry Between Growth Opportunities and Debt Maturity Structure". *Working Paper*.
<https://dx.doi.org/10.2139/ssrn.3906487>.
Using the recent public health pandemic (COVID-19) as a laboratory experiment, I find evidence of an asymmetrical relation between a firm's debt maturity struc-

ture choice and its growth opportunities. Firms with high pre-pandemic exposure to growth-inducing factors obtained from 10-K filings have increased debt maturity and are more likely to exercise a call on their callable bonds, while firms with high pre-pandemic exposure to growth-reducing factors are null in taking any actions to adjust their debt maturity structure. Further, the increase in debt maturity following exogenous changes in growth opportunities suggests a unique type of change in firms' growth options following the recent pandemic, supporting the arguments proposed by Diamond and He (2014) and Childs, Mauer, and Ott (2005).

- Alhudhaif, Eyad. Berger, Allen. Kim, Hugh. (2021). "Firm Risk Exposure Concentration and Debt Structure Choice". *Working Paper*.
Firms with more risk shifting problems due to the high-risk exposure concentration are likely to include more short-term debt in their capital structures and less covenants in their outstanding bonds. Using a firm's risk exposure concentration derived from the written text in 10-K filings, we find this effect is more pronounced among companies with strong managerial incentive alignment with shareholders. The findings suggest maintaining future investment flexibility is important for firms with high-risk exposure concentration, even at the expense of a higher liquidity risk associated with the use of short-term debt.
- Alhudhaif, Eyad. (2016). "Corporate Payouts Under Economic Policy Uncertainty". *Working Paper*.
Using a sample of all public firms in the U.S. between 1985 and 2015, I examine the relation between firm's payout policy behavior under changes economic policy uncertainties, both total and individual components of payouts; dividends and open market share repurchases. Using the EPU index and its components developed by Baker et al. (2016), I find payout programs tend to respond differently depending on the source of economic uncertainty. A persistent negative relationship exists between the level of uncertainty in government spending (GSU) and firms' average level of dividends, share repurchase, and total payout.

Projects

- Developed an application (**Malaah_app**) for *Malaah Financial Consulting*. The simple program serves as a helpful tool for the employees in the office to determine the appropriate financing products their clients can buy.

Involvements & Awards

- Mentored students in the "Distinguished and Talented Students Program", *King Saud University* (2023)
- APICS Great Lakes District Student Case Competition; ranked 4th, *Indiana State University* (2014)
- Beta Gamma Sigma Award, *Indiana State University* (2014)
- Secretary of the MBA Association, *Indiana State University*, (2013-2015)
- Member of the Association for Operations Management, *University of Indianapolis Student Chapter* (2013)
- Member in the Investment Club, *Indiana State University*, (2013-2014)
- Outstanding Student Award, *University of Washington* (2011)
